DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I in Paper No. 6 is acknowledged.

Claims 14 - 44 have been withdrawn from consideration.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 13 are objected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language of the claims must clearly distinguish the elements of the claims. Therefore the "bend radius guide" must be clearly supported by the disclosure. Page 4 defines the members 138 as controlling the bend radius of the fiber but members 138 are not mounted to the drawer.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 5 and 13, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mayer. Mayer is cited showing a side 306,

a link 300, a second link 302, and a sliding drawer 106. The pin 304 and flange 500 can be said to manage the bend radius.

Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 4, as presented, are rejected under 35 U.S.C. 103(a) as being unpatentable over Mayer as applied to claims above, and further in view of the ordinary skill of one versed in the art. Mayer fails to show integral clips. Generally, making parts integral or separable is considered an obvious matter of design choice. Here Mayer shows slips 318 that are not integral but it is considered to be an obvious modification within the ability of one having an ordinary skill in the art to make the clips integral with the link members. Therefore it would have been obvious for one having an ordinary skill

in the art to have modified Mayer with integral link and clip members as an obvious matter of design choice.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McAnally et al, Schulter, Harwell and Sisk et al

Allowable Subject Matter

Claims 6-12 would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims.
